

Ordering an Aqualu custom dash

Please Follow the 3 steps as shown below:

1. Use top left hand corner of the dash as you're reference point.
2. When placing circular cut-outs please give the diameter as well as the measurements to the center. (eg: 2 ½" diameter, over 22" and down 3 ½")
Check manufactures specs for required gauge hole sizes.
3. When placing rectangular cut-outs, measurements need to be from the top left hand corner of the dash to the top left hand corner of the cut-outs.
(eg: 4" x 2" rectangle, over 32" and down 6 ¼")
